EDUCATION

College of Mary Immaculate of Pandi, Bulacan, Inc.
Bachelor of Science in Computer Science

J.P Rizal St, Pandi, 3014 Bulacan
Graduated, March 31, 2026

EXPERIENCE

JCAS Logistics

99 Santiago 236 Jacinto St. Brgy.Santiago, Malolos Bulacan

Software Developer Internship

April 21, 2025 – May 31, 2025

- Developed a application, building responsive frontend interfaces using FlutterFlow and implementing application logic with Dart.
- Integrated backend services using Supabase (PostgreSQL) for real-time data querying and management of tracking information.
- Designed application wireframes and user flows using Balsamiq to guide UI/UX structure and feature planning.
- Collaborated in a team-based development environment, contributing to module-based implementation and coordinating progress across components.

PROJECTS

Shelf Seek

Pre-processing Engineer, Frontend API Testing, Designer (UI/ UX)

- Engineered a book search engine enabling retrieval of titles, authors, descriptions, and ISBN metadata through a RESTful API built with Node.js and with MongoDB for scalable data storage.
- Designed and implemented a web scraping pipeline using Playwright (Python) to extract structured data from Barnes & Noble, ensuring up to date real world book data.
- Developed a custom Natural Language Processing (NLP) module, including n-gram modeling, tokenization, vectorization, and classification for improved search relevance and query understanding.
- Containerized the application using Docker, enabling consistent deployment and environment portability across systems.

Numi

<https://livingsprites.vercel.app/>

Project Manager, Artist (UI / UX, Game Assets), Publisher, Game Designer & Developer

- Developed an offline mobile game that gamifies first-grade mathematics, implementing core gameplay systems, UI, and animations using GDScript in the Godot Engine with performance optimization for low-end devices.
- Engineered local data management using SQLite and JSON to handle player progress, achievements, and dynamic level configuration.
- Designed and produced original pixel art assets and cohesive color palettes using Aseprite, aligning visuals with early learner engagement goals.
- Deployed the application as an Android (.apk) build and architected supporting web for distribution and administrative control.

SKILLS

Programming: Javascript, Node.js, MongoDB, MySQL, SQLite, Python, C++, GDScript, PHP, FlutterFlow, Ubuntu

Tools: Godot Engine, Aseprite, Figma (UI / UX) , Git, Github, VSCode, Docker, Oracle VirtualBox, Balsamiq

AI Tools: ChatGPT, Claude
